SOME PROBLEMS OF NUCLEAR THEORY

A. Akhiyezer, and I. Pomeranchuk

Note: Subject book published 1948 by the State Publishers of Technical-Theoretical Literature (OGIZ) represents a survey monograph devoted to a number of problems of nuclear physics for whose solutions an accurate theory of nuclear forces is essential. It is intended for scientists, advanced students and candidates specializing in nuclear physics. Presented below are the table of contents. Also appended is a list of 20 references solely from Russian sources7.

Table of Contents Page Preface Chapter I. Interaction of Neutrons and Protons 1. Scattering c Slow Neutrons by Protons Classification of the States of a Neutron-Proton System and the Basic State of a Deuterons 17 33 Scattering of Neutrons in Para- and Orthohydrogen 48 Scattering of Neutrons by Bound Protons Observations on the Scattering of Fast Neutrons 54 by Protons. 57 Scattering of Protons by Protons

			Page		
	7.	Capture of Neutrons by Protons	65		
	8.	Photofission of Deuterons	81		
Chapter II.	Statistical Properties of Heavy Nuclei				
	9.	91			
	10.	Statistical Properties of Heavy Nuclei	97		
	11.	Relation Between Width of Levels and Cross- Section of Formation of Composite Nuclei	106		
	12.	Effective Cross-Sections for Elastic and Non-elastic Collisions	111		
	13.	Probability of Capture	125		
	14.	Energy Distribution of Particles Emitted During Disintegration of Composite Nuclei	133		
	15.	Radiation Properties of Nuclei	135		
Chapter III.	Resonance Phenomena				
	16.	6. Dispersion Formula			
	17.	Theory of Resonance Scattering	149		
	18.	. Capture of Slow Neutrons by Free Nuclei			
	19.	. Neutralized Effective Cross-Sections			
	20.	Observations on Nuclear Reactions Taking Place With the Assistance of Charged Particles			
Chapter IV.	Fission of Heavy Nuclei				
	21.	Mechanism of Fission	191		
	22.	Probability of Fission			
	23.	. Chain Reaction			
	24.	An Example Given for Determining Critical Dimensions in Fast-Neutron Reactions			
Chapter V.	Interaction of Slow Neutrons and Matter				
	25.	Capture of Slow Neutrons in Crystals	236		
	26.	26. Elastic Scattering of Slow Neutrons in Crystals			
	27.	Nonelastic Scattering of Slow Neutrons in Crystals	270		
	28.	Transition to Scattering by Free Nuclei	283		
	29.	Distribution Function of Neutrons in Crystals	288		
	30.	Refraction of Neutrons	296
